Suffolk County Executive Steve Levy
Suffolk County Legislator Daniel P. Losquadro
Suffolk County Legislator Edward Romaine
Brookhaven Town Supervisor Mark Lesko
Brookhaven Town Councilwoman Jane Bonner
Shoreham Civic Organization President Kevin Ward
and others.

Why: To bring attention to this special and valuable place in our own community. The Tesla Laboratory was designed by renowned architect Stanford White for his friend Nikola Tesla, the inventor and developer of radio, alternating current generation, remote control, robotics, neon lighting, and much more. It is a place of national historic significance and should be preserved. The National Trust for Historic Preservation has asked people across America to identify places that are important. They want photographs of people near the places that matter. The Wardencllyffe site is an excellent example of a significant place that should be protected.

You: Be part of the “This Place Matters” group photograph for inclusion on the website of the National Trust for Historic Preservation. Learn about the importance of the Wardencllyffe site. Find out how you can help to save this treasure in the Shoreham community.

Come to support the preservation of this significant place! Let the world know that “This Place Matters!”
